

Amendments to the Specification:

*Please replace paragraph [0022] with the following amended paragraph:*

According to the present invention, a plurality of cleaning nozzles 80, each having a number of injection holes 84 formed at intervals in a nozzle body 82, are preferably formed at predetermined positions along the outer circumference of the filter assembly 70. The size of the resulting number of injection holes 84 formed in the nozzle body 82 is determined by the pressure of water pressure of supplied by a service pipe supplying pressurized water to the water circulating means.
